

## **ADP Credit 3.0**

### ***Introducing the ADP Credit 3.0 release***

ADP is pleased to announce ADP Credit version 3.0. This release includes the following new features and workflow improvements.

### **Compliance Products**

#### **Mandatory ADP Red Flag with First Credit Inquiry**

- ADP Credit now provides the ability to lock the Red Flag inquiry so it automatically runs as part of the first credit inquiry transmission for each consumer.
- User cannot circumvent the execution of Red Flag when set to “Locked.”
- You can also re-run a Red Flag report for a consumer on demand.

#### **Adverse Action Letter Enhancements**

- You can print a one-off letter as you process each deal.
- You can now batch print letters on a daily or weekly basis.
- Adverse Action is now included as a compliance product on the Compliance Scorecard.

#### **New Compliance Icons on Summary Screen**

- Summary Screen and Inquiries now use green or red icons to quickly reference complete or incomplete consumer check status.

### **Contract Validation**

ADP Credit enables an eContracting solution for Mercedes-Benz. Integrating with this solution requires FK575. The integration for Mercedes-Benz provides contract decisions and a sequence number to ADP Credit once a contact has been fully verified by Mercedes-Benz Financial. This integration eliminates potential errors when sending the contracts to Mercedes-Benz, and significantly reduces the turnaround time for funding.

#### **Seamless, Simple process**

- Pull data directly from F&I.
- Add any missing MB required fields.
- Transmit your contract and see the validation results in less than 10 seconds.

#### **Storage of Validation results**

- Store the validation results for the life of your contract.
- Re-print the validation report on demand.

#### **Print Validation Number on Your Retail Installment Contract and Lease Agreements**

## **Credit Applications**

### **RouteOne Business Credit Application Processing**

- You can now create and transmit business credit applications to RouteOne.

### **Improved Credit Application User Interface**

- ADP Credit now provides one consistent method for creating credit applications from all application tabs.

## **Online Help**

### **Improved Navigation within Online Help**

- You can now search online Help and use the collapsible Table of Contents to navigate the entire system.

## **BMW Enhancements**

- Credit applications now include a drop-down menu for Vehicle Make.
- Credit applications Vehicle Makes drop-down now includes a choice of Other to accommodate other makes and models.
- Credit applications now include Type of Vehicle and updates for Demo types.
