

## How to Setup Shop-Click-Drive Program in RouteOne

This guide will walk you through the three pre-requisite steps that are required to participate in the Shop-Click-Drive program. The three items covered in this guide are:

1. *Finance Source Association to a Shop-Click-Drive finance source*
2. *Credit Bureau Subscription Codes*
3. *Vehicle Values Subscription Set up*

As you move forward with these steps, you may notice that some or all of the steps may be completed already and that no additional action is required. If that's the case, you may proceed directly to the second guide which covers the steps to setup the RouteOne rules engine.

**Please note that all of these steps must be performed by your Dealership System Administrator, or DSA.**

1. **Finance Source Association to a participating Shop-Click-Drive Finance Source**  
The first step is to confirm your relationship with a participating Shop-Click-Drive finance source – Ally, GM Financial, or Wells Fargo. Additional finance sources will be added in the near future, but to get started now, if you have a relationship with any one of these three finance sources, you may proceed. To quickly confirm your association, you can simply click on the “New App” tab in RouteOne and view your active finance sources.
2. **Active Credit Bureau Codes**  
The second step is to load your Credit Bureau subscriber codes into RouteOne. These codes can be obtained from your credit bureau provider. You will need to call your credit bureau provider and ask for your subscriber codes to enter into RouteOne. Please note that your provider may be a credit bureau reseller such as NCC, ProCredit, or many others, and not the credit reporting agency (*TransUnion, Experian, Equifax*) itself.
3. **Set up Your Vehicle Values Subscription**  
The final step is to subscribe to Kelly Blue Book, NADA, or BlackBook vehicle values. This subscription will allow you to provide the customer with an estimate on his or her Trade-In vehicle while the customer is shopping online, and also provides robust bookout capabilities within RouteOne. As mentioned in other Shop-Click-Drive videos, the vehicle value that online shoppers receive is an estimate, and is subject to the final inspection of the vehicle.
